It Leant make all the least - 15 is enough - Cask if this was the only thing here would be enough to get hired? It * Lout make them download things (including plug-ins) - not overly whimsical * Clearly state skills and applications * site loads quickly - if your site isin make sure bonts are easy to read O-organize by deliverables and project X-offinize images for the site (image editor, not css) - one picture of yourself is enough - be up front on availability (currently working on a project) - show your education X- keep your portfolio current X-grid layout - your physical location - to cont keep your work visible in the initial visible field (above.) the fold = shows understanding type, color, term, belonce - the does their work accentrate the copy or work against it X - shows planning ? insight into farget andience - no curpeake shop identities - show originality - do not just follow frends - prulaging experience necessary - time - For - Jazzle them - logo work (branding experience)

strategy

The objective of the portfolio is to help me get a job. As such, it is important to know what the target audience (potential employers) is looking for in applicant portfolios.

Potential employers can be broken down into three hiring categories: web design, web development, and freelance work. Each has different needs and must be considered. Readability* must be considered in terminology, especially with freelance employers.

Research was done with web articles and blog posts where employers have given tips (and pet peeves) to aspiring applicants. Several of the points have been reflected in the goals and pain points of the personas in the following pages. However, research revealed that the main goals of employers is to evaluate the work, skills, and experience of applicants.

Primary Persona

I'm always busy with work, but when we need someone new I get flooded with portfolios.

Age:

Salt Lake City Location:

BFA Education: Struck Employer:

Key Characteristics

- Knows a good portfolio when she sees it
- Quick to move on to the next applicant
- Experienced in her job

Goals

- See a designer's process and reasoning in projects
- Evaluate the designer's understanding of copy, color, form and balance

Pain Points

- Slow loading site
- Designer skills and capabilities unclear
- Portfolio out of date
- Portfolio incompatible with browser
- Project pictures too small

Influencers

- · Physical location of designer
- Contact information provided

Megan used to enjoy looking ing for several years as creative director at Struck, it's definitely gotten old. She understands that a portfolio is the first impression a designer makes with the potential employer, which is why she's been consistently shocked at how many poorly organized and just plain ugly portfolios she's received. Second rate portfolios don't last long under Megan's scrutiny. She's a busy lady and doesn't have time for portfolios that don't load quickly, are poorly presented, out of date, NOT download a plug-in just for a portfolio.

Skill Levels

HTML5

javascript Wordpress

Adobe Creative Suite

Secondary Persona

I'm tired of having to look for applicants' coding. They're applying for a development job, not design!

Age: 34
Location: Orem
Education: BS
Employer: Izeni

Key Characteristics

Not so interested in the images (although artistic ability is a plus)

Goals

- See coding snippets in order to evaluate the applicant's authoring abilities
- See what experience with web development theapplicant has

Pain Points

- · Div happy developers
- Developer skills and capabilities unclear
- · Portfolio out of date
- · Portfolio incompatible with browser

Influencers

- · Physical location of designer
- Easy to use site
- · Easy to find coding snippets

The design portfolio process is fast compared to the development portfolio review Amanda has to go through. The skills section on the resumé is the first place she goes to see if an applicant is qualified, closely followed by their work experience.

Often times developers treat their portfolio like a designer's, with images and explanations, which is great, but Amanda wants to see coding snippets. It is a development job and she wants to see their development skills in their coding.

Skill Levels

CSS3

javascript

HTML5

Wordpress

Adobe Creative Suite

Secondary Persona

Starting a business is a lot of work. I could use a little help to get things going, especially with the website.

Age: 38
Location: Riverton
Education: MBA

Employer: Self-Employed

Key Characteristics

- · Little experience with web languages
- Has no artistic ability, but knows if something looks good

Goals

- See past work on e-commerce sites
- Evaluate "user-friendliness" of e-commerce sites the designer has worked on
- Understand the designer's style

Pain Points

 jQuery, javascript, ruby, python; What do these all mean for his business?

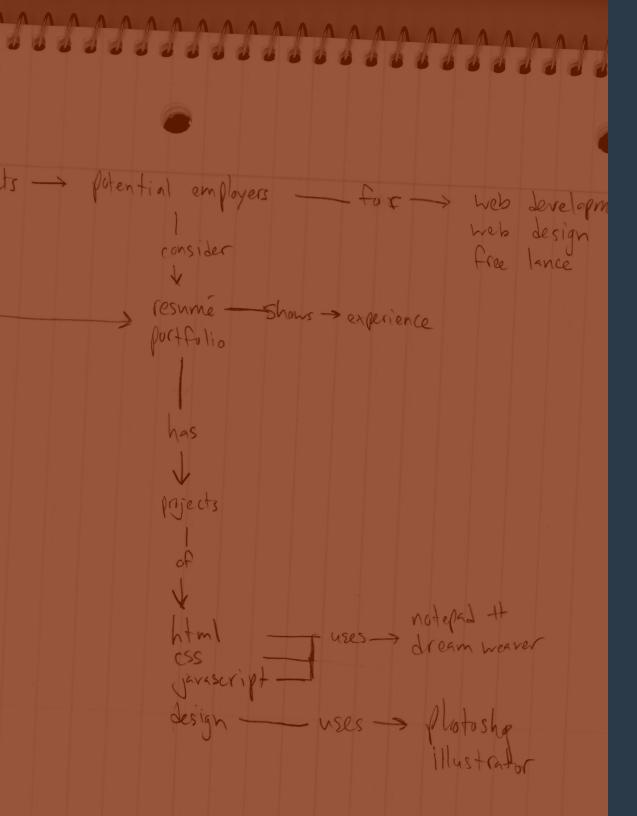

Influencers

- · Physical location of designer
- Contact information provided with quick response time from designer

Raj has the experience to create a business plan, but finds himself extremely lacking in the creative department. Branding and websites play an essential role in business in the modern day, and Raj understands that. However, the skill set required of the designer to create and brand his e-commerce site is a complete mystery to him. Because Raj is unfamiliar with the functionality of many of the coding languages, the presence of an e-commerce site in a portfolio is essential.

Skill Levels

HTML5
CSS3

Wordpress
Adobe Creative Suite

scope

Knowing the audience now, scope addresses how to best meet their needs with site elements and features. With that knowledge, understanding the relationship between the user, their goals, the site elements, and the site goals is the next step. These relationships are explored with the concept map.

Some portfolios allow comments, sharing links to the portfolio on social media, and show facebook likes. These elements are aimed more towards fellow-designers than employers. Having too wide a scope can cause the portfolio to lose focus on the main goal of getting me a job. Too many features can also cause confusion and make the site less usable*.

flexibility usability trade-off

s the flexibility of a system increases, the

Concept Map v3

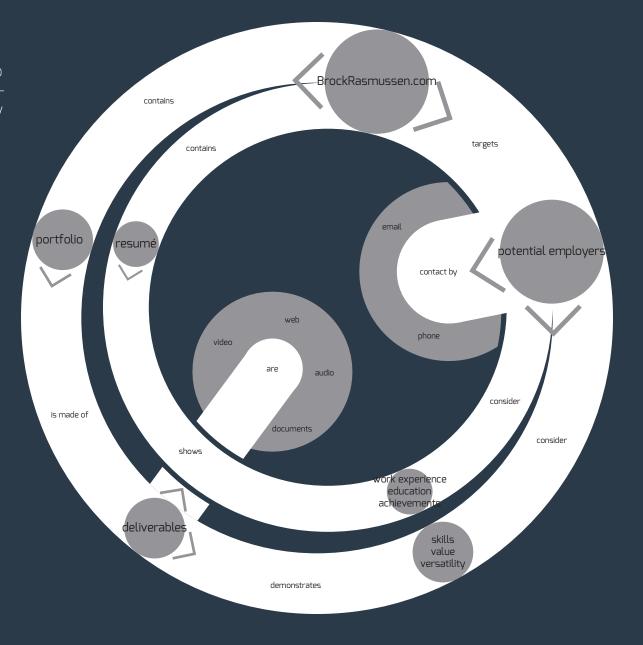

Having known that the site purpose is to help me get a job, the concept map generalizes the goals of the personas to two main points. Employers consider experience and skills (the resumé), and my design process in my work (the portfolio). The skills directly correlate to how the work in the portfolio is developed. In order to help potential employers evaluate my skill level in my work, projects will be filterable by deliverable and skill involved.

In regards to Megan, Amanda, and Raj's specific goals, there are several more features required to satisfy their needs.

Megan requires details and specifics on projects with the development process and skill set involved.

Amanda wants to see coding snippets for projects.

Raj needs clarification on how different skills are relevant to him and his needs (python, ruby, php. etc.). Definitions and uses will be given in an "i" information link pop-up frame.

structure

In developing the scope, features and elements of the site are clarified. Structure deals with chunking* the information into pages or sections to make the information presented more navigable.

Site structure development began with post-it notes. Cheap, quick, and easy to move around, they made quick work of prototyping site structure and made visualizing navigation easy before cementing the final structure.

In the post-it notes phase (left) the site was to have a separate page for each section, but I quickly realized there was not enough content to populate each page and it was then adapted to the one-page structure seen in the site map on the right.

*chunking

echnique of combining many units of informaion into chunks for easier processing

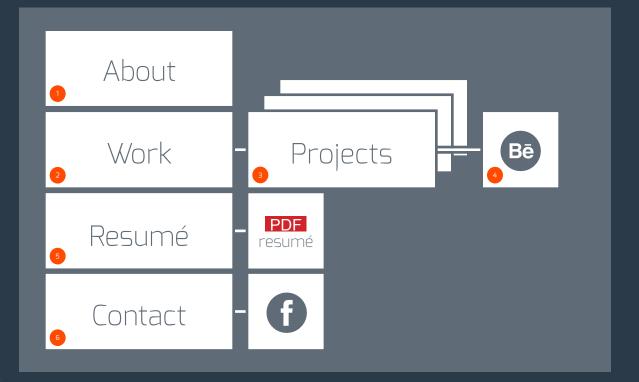

Site Map

The landing page will be a welcome/ about area to ease into the other sections. The subsequent sections of the page directly reflect the three goals identified in the concept map.

- A welcome and introductory section.
- 2 A handful of most recent and featured projects will be displayed. A link to Behance to see more projects will be at the bottom.

Each project image will act as a link* to a page dedicated to that specific project. Megan and Amanda's needs addressed in the scope section will be satisfied in these project pages.

- The goal is to showcase the planning behind the project. If it is a group project, my part in the project will be explained.
- More pictures of the current project can be found in my Behance portfolio. On the resumé in the skills section the definition of the authoring languages will be given to meet Raj's need

- My resumé can be downloaded as a PDF, and will also be visible as web elements.
- Basic contact information can be obtained. Information will be hyperlinked to provide ease of use.

*progressive disclosure

Only necessary or requested information is displayed at any given time.

skeleton

With structure, post-it notes made it a breeze. Similarly, a pencil and paper are the cheapest and most time-effective form of getting wire-frame ideas out.

Employers have many portfolios to view, so high signal-to-noise ratio* is a must to keep their attention on the necessities.used in the surface compositions are displayed and shown on the right. Font and colors make a huge impact on the look and feel of the site and much care has been taken in the choice.

surface

Surface takes the skeleton and gives it flesh with color, images, and the fonts that will be used.

For the surface compositions I used Adobe Illustrator because it is easy to use and takes less time with it's click and drag objects rather than the layers involved in Photoshop. The only pitfall of Illustrator is that it will sometimes scale the text itself rather than just it's bounding box.

The color palette and the fonts to be In the following pages the process from wire frame to surface composition is laid out with notations and side by side images for the desktop, tablet, and mobile platforms.

*signal-to-noise ratio:

Ratio of relevant to irrelevant information in a

way finding:

Cues as to one's location on a site or a web page. (i.e. breadcrumbs)

Brand Colors & Typeface

Exo

Exo complements the role of the dark teal in the color scheme. It is easy to read and maintains a unique minimalist look and technical feel. The rectangular letters are noticeably distinct from the more rounded and more commonly used sans-serif fonts of arial and verdana. Exo provides a wide range of font weights each also available in italics. However, Extra Light (200) is the weight to be used in both copy and headings. Available with Google fonts, consistency across devices and browsers will be achieved.

Thin (10

Extra Light (200)
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890\$%&*(,;;#!?)

Light (300)

Regular (400)

Medium (500)

DemiBold (600)

Bold (700)

ExtraBold (800)

Black (900)

IM Fell English

IM Fell English will be easily distinguished from Exo. It is easy to read and has a professional feel. IM Fell English will have very limited use and will be used only for short quotations. Available with Google fonts, consistency across devices and browsers will be achieved.

Italic (400)
ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
1234567890\$%&*(;:#!?)

Red-Orange CMYK: 0 / 71 / 100 / 0 RGB: 255 / 75 / 0

Conveys innovation and ingenuity.

Dark Teal

CMYK: 42/19/0/72 RGB: 42/58/72 HEX: #2A3A48

Represents trust, efficiency, logic, and

Conveys professionalism and reliabil-

Σy.

White

CMYK: 0/0/0/0 RGB: 255/255/255 HEX: #FFFFFF

Represents simplicity and sophistication

Acts as the neutral between the bright red-orange and the dark teal.

Teal

CMYK: 19 / 9 / 0 / 54 RGB: 95 / 107 / 118 HEX: #5F6B76

75% tint of Dark Teal

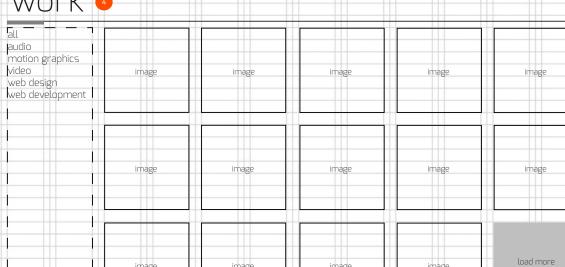

Acts as an accent background to highlight or differentiate bodies of text.

Resumé

Skills Experience

Skill Company Name start date - end date

Desktop Wire Frame

🕛 With a long one-page design, sticky navigation will provide easier accessibility to the different parts of the page. On the surface composition to the right, the navigation will be a regular element for the length of the about section, but after scrolling lower it will become sticky and look like the navigation bar at the bottom of the surface composition.

Potential employers contacting me is a fundamental part of this page. There is a section dedicated to it, but to make it easier the phone and email icon at the top left (top right on the surface composition) will be sticky the entire length of the page.

- Rather than having a logo on the navigation bar like in the wire frame, the logo will replace the large welcome writing in the about section.
- Rather than being left aligned like in the wire frame, the social media links will be centered below the about paragraphs and above the navigation links.

Desktop Surface Composition

The tags in the work section will be listed horizontally rather than vertically. The tags will not be sticky elements the length of the work section.

> Employers want to see my work, so images tiles must be large for easy viewing. Project images weren't large enough on the wire frame, so in the surface composition they are 3 to a row rather than the 5 in the wire frame.

Donec vulputate dictum justo sit amet sodales.

Work

Tablet Wire Frame

- The tablet surface composition format is not much different from the desktop. The major difference is the sizing of elements.
- In the wire frame the amount of images per row decreases from 5 on the desktop to 3 for the tablet, but remains the same for the surface composition.

Tablet Surface Composition

Lorem ipsum dolor sit amet, consectetur Donec id nisi faucibus, tempus mauris vel, adipiscing elit. Donec lacinia augue sit amet porttitor leo. Mauris aliquam lorem at augue pulvinar placerat. Mobile Wire Frame

Navigation for the mobile surface composition will be as planned for the wire frame, except the phone and email icons (see point 2). It will also be sticky.

- The tags are gone and there is a long column of projects. In order to make the images large enough for easy viewing there is only one project per row rather than the two shown in the wire frame.
- Skills and Achievements will not split the screen as shown in the wire frame, but will have their own section like Experience and Education.

Mobile Surface Composition
